Lars Halvor Hansen

Oslo, Norway | LinkedIn | 908 09 670 | lars@halvorhansen.no | Github

SUMMARY

Very creative, and intrinsically motivated student in the final year of a master level electronic engineering degree. Bc in economics. During the studies, I have become increasingly interested in data-science and economics. Thus I am overqualified in harware/firmware experience.

SKILLS

Programming & Query Languages
Python, C++, SQL, JavaScript

Data & Analysis
Excel, pandas, NumPy

DevOps & Tooling
Git & GitHub, Linux, Docker, Nix, Vim

Engineering Design (CAD/EDA)
Altium Designer, KiCAD, SolidWorks

Technical Writing & Documentation
Typst, LaTeX, Markdown, MS Office, Google Docs

Languages
Norwegian (native) · English (fluent C2)

EXPERIENCE

Sony Semiconductor Europe | Digital Design Intern June–Aug 2024
- Developed Python/YAML to SystemVerilog UVM translation tool, automated verification processes
- Improved knowlage about the efficiency language automation tools

Disruptive Technologies | Embedded Intern June–Aug 2023
- Designed IoT sensor hub with Nordic nRF9160 and ZephyrRTOS, achieved significant power reduction
- Developed cloud connectivity solution proof of concept for next generation product

Orbit NTNU | Systems Engineer and Electronics Engineer Sep 2022–June 2024
- Designed STM32-based OnBoard Computer PCB for BioSat CubeSat mission
- Developed power budget analysis for 7+ subsystems

NTNU | Teaching Assistant in Introduction to Electronics Aug–December 2023
- Supported students by providing technical guidance during lab sessions and lectures

ShiftHyperloop | Battery Systems Engineer Sep 2021–Jul 2022
- Designed high-voltage battery enclosure (200V+) with integrated BMS
- Engineered EMI shielding and thermal management for competition-grade hyperloop pod

Ungdomsakademiet | Private Tutor Jan 2019–Jun 2020
- Private tutoring in mathematics, science and English with measurable grade improvements

PROJECTS

Economic Articles (2023–present): Publishing analytical articles on macroeconomics and market trends | halvorhansen.no/economicoutlook

LambdaSim Project (Jul 2024–present): Modeling relationships between economic factors using stochastic simulation methods and autonomous agent modeling | halvorhansen.no/lambdasim

EDUCATION

NTNU | Electronic System Design and Innovation Master Trondheim
Specialization in Space Systems June 2027
NTNU | Economics - Bachelor's Degree June 2026
